# CultureBuddy

A technology solution for Global Nomads Group

Bridging the gap

- Limited technology in underdeveloped countries

- CultureBuddy is a mobile communication platform to enable cross culture interactions

- We overcome the language, time-zone and technical difficulties
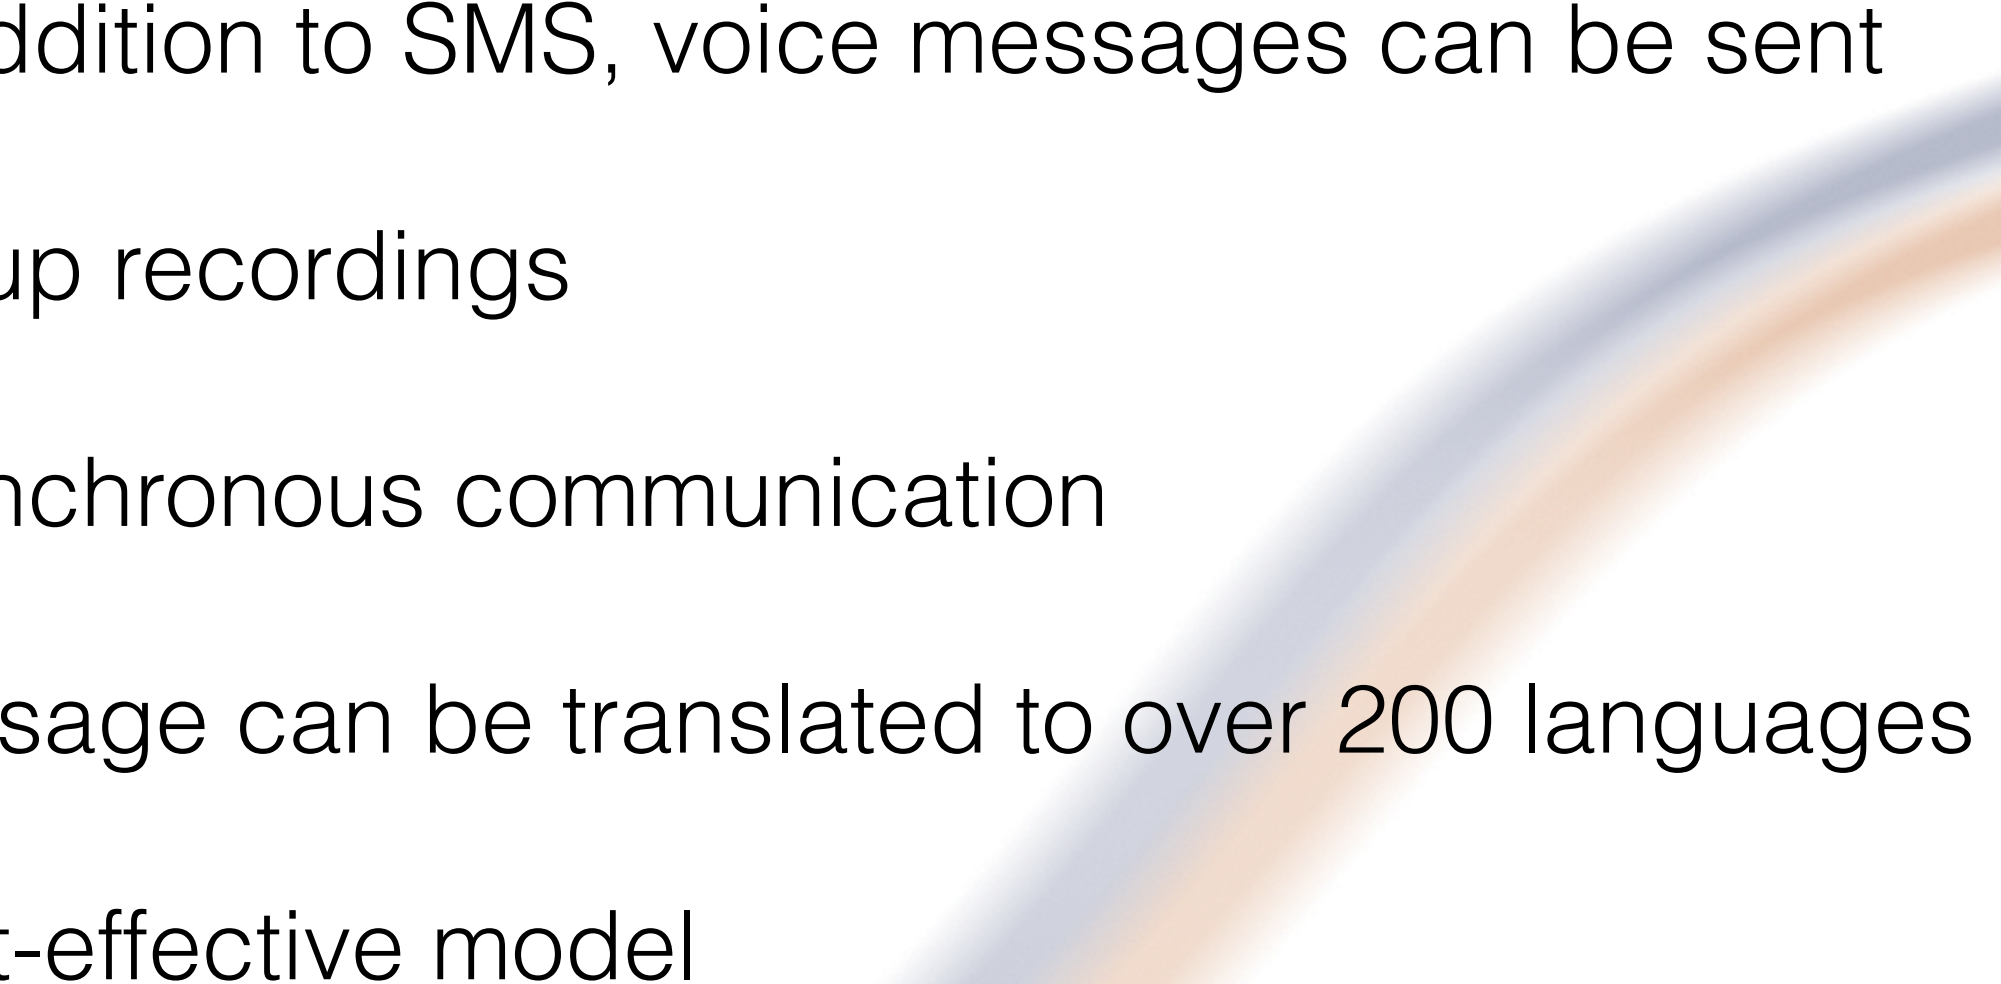

How it works

- Android smartphone messaging application

- Moderation functionality for teachers

- Server-side language translation

- Conversation saved on server database

- SMS and voice messages for dumb phones

Text messages / voice
via internet

Server

SMS / voice

Moderation

- The teachers of student groups act as the moderator of the conversation

- They can communicate with each other and setup new interactions through a web app

- Moderators have the option to approve messages before they are delivered

Messaging

- In addition to SMS, voice messages can be sent

- Group recordings

- Asynchronous communication

- Message can be translated to over 200 languages

- Cost-effective model

Android App

Thank you for listening
